Hotels

I-POINT TOTEM is an adequate means of establishing successful communication with the customer in the hotel or it can be put in your tour operator's front office to extend your and your partners' benefits.

The high tech digital signage solution can be used with or without "touch screen" technology.

I-POINT TOTEM without touch screen can be put:

- Near the Entrances
- In Bars and Restaurant
- In the Lobby

Available Applications of I-POINT TOTEM without touch screen:

- Suitable for your information comfort and corporate identity
- Used as an advertising device or a luxury accessory in your aspiration for undoubted hospitality reflecting from each element of the interior
- An expression of your distinguished and exquisite taste
- A way or a means for satisfying your guests' refined thirst for luxury
- A fancy dress for your designers' ideas and a reply of their imagination

I-POINT TOTEM with touch screen is suitable for:

- The Reception Desk
- Each Floor
- In the SPA&Wellness Centre
- In the Fitness Centre
- In Bars and other Places for Entertainment

I-POINT TOTEM gives you the opportunity to establish successful practice in communication processes with the customer being already your guest. In your aim of presenting to his attention and supplying the most considerable value in his trip, tour, holiday or business mission - I-POINT TOTEM will help you do your best in exposing everything you have in store for him both from the hotel and the destination and the surrounding area.

Tourist product is invisible ...

I-POINT TOTEM will make your products, services and hospitality visible from the first step of your guests in the hotel.

Tourist product is intangible or a combination of tangible and intangible parts...

I-POINT TOTEM is a new way of feeling the atmosphere and satisfaction before experience and after that revealing the thrill of experience by sending messages in a smart way and receiving information gently touching the elegant screen

Tourist product has a complex structure. Many people say it's hard to show the product or to advertise in tourist industry...

I-POINT TOTEM reception system is at the forefront of digital signage, combining visual high technology, contemporary elegance and portability. The design of this reception totem board, its impact and ease of use are the essential qualities that make the I-POINT TOTEM an invaluable tool for businesses and organisations to communicate information, messages and notices simply but extremely effectively.

I-POINT TOTEM put at the reception desk is both a sign and a screen. It gives a unique impact to all kinds of information and images displayed. The captivating "Portrait" format of the screen inside the housing, by its nature, focuses peoples' attention and makes reading and viewing images appealing.

Bespoke and dynamic sequences of pages appear with text either on different coloured backgrounds or blended with any choice of images. Whether it be messages, announcements or events, the simplicity and aesthetic appearance of I-POINT TOTEM draws the onlooker to its message.

I-POINT TOTEM at the Reception Desk is extremely versatile and is invaluable addition in any application: hotels/conference centres, company receptions, golf/country clubs, schools/colleges/universities, retail showrooms, banks/financial institutions and many more.

I-POINT TOTEM will solve your problem. Show your guests all their possibilities in making their choice for:

- Main Services (Rooms - Single, Double Room, Apartment, Dining, Room Service)

I-POINT TOTEM is an exciting new breed of interactive digital display advertising that provides a truly dramatic and compelling platform for displaying interactive content. Its interactive digital display features an elegant podium that supports a large Liquid Crystal Display and touch screen mounted in portrait mode. These touch LCD screens are the largest true touch LCD on the market. The size, clarity and incredible responsiveness of the touch LCD provides an exiting and easy way for the user to interact with the application.

I-POINT TOTEM's dramatic format attracts and engages the user unlike any other form of digital advertising. On I-POINT TOTEM's touch LCD, pictures are almost life size, and text can be read from across the room. The customer can use a whole hand, instead of just a fingertip, to interact with the application, taking interactive devices and digital advertising to the next level.

I-POINT TOTEM provides sophisticated, state of the art interactivity for users and an engaging, immersive motion graphics presentation.

Professional digital signage software

I-POINT TOTEM allows you to make an exquisite exposition of your products and services, your newest collection, news, promotions and discounts, internet access, FIDS for airports.

Our professional software solutions are based on thorough market researches and profound analysis to achieve ultimate solutions resolving our clients' problems.

Our specially developed professional digital signage software gives our customers a unique market advantage and a series of enhancements in servicing clients, providing them with information in time, possibility for them to interact with technology.

I-POINT TOTEM can be with or without touch screen and for that purpose it could be manufactured with touch-enabled software.

I-POINT TOTEM has all-in-one design that allows the built-in PC to fit straight to your customers' practice with computers.

Customers are demanding a whole solution. That's what counts. IT Systems are getting more complex every day and it's important that I-POINT TOTEM is available for use in most of the time saving the efforts of the serving staff. I-POINT TOTEM is a natural extension of the achievements and innovations in screen advertising and can prevent customers from getting bored during the "please wait" period.

I-POINT TOTEM allows you to make an exquisite exposition of your products and services, your newest collection, news, promotions and discounts and everything else you could capture your customers' attention using contemporary technologies in visual, communicational, computer, informational technologies. Our software solutions provide customers with a series of enhancements in their interaction with the device. We have our own custom software meeting the needs and requirements of a variety of sectors.

The software was specially developed for the I-POINT TOTEM and it is being constantly improved to make the device more effective in informing and serving clients and to upgrade its complicity and possibilities for application and diversification. Our teams of engineers are constantly looking for ways of improvements. We can develop more complex software solutions according to our customers' needs in a number of spheres of political, economic and public life. Its easiness in exploitation and accessible way of giving the required information is a results of the specially developed and user friendly operating system.

We are elaborating on contemporary software products for business management on the bases of the technology "Client / Server" and "Internet / Intranet" solutions conforming to the leading world standards in the field of information technologies.

Our objective is to create fast and reliable applications for short terms, satisfying the needs and the requirements of the clients. We achieve this through long-term experience and team work in the process of designing, developing and testing the software.

Our efforts are oriented towards the creation of qualitative solutions which can be used easily and intuitively by experts in different spheres and not only by IT specialists. The technologies, being implemented by us for the development of software secure flexibility and possibilities for future development of the applications.

Our clients may rely on both standardized and on individually developed solutions for the fulfillment of their requirements.
